

REMARKS

The Specification is amended to correct grammatical and idiomatic errors. The Specification is further amended to clarify existing descriptions. For example, the specification explained that a power supply could be implemented as a large capacitor or as a battery, and then alternated the use of the words capacitor and battery. The specification is amended to more consistently use the generic term "power supply" in place of alternating examples of a power supply.

Claims 1-32 are presented for examination. Claims 1-24 have been amended to address idiomatic errors and to place them in better form for U.S. Practice. Claims 25-32 are new.

No new matter is added by the present amendments.

Favorable consideration is respectfully requested.

Respectfully submitted,

Rosalio Haro
